

Conservation and Management of “Getbol” World Heritage Sites Suncheon Bay

대한민국 생태수도 일류 유치

01 The path that Suncheon, the Wetland City has walked

A city that chooses coexistence between humans and nature, rather than following the path of industrialization that all cities have taken

Population

281,082

Rising as one of the top three cities in the Honam region(Suncheon, Gwangju, Jeonju)
125,053 households

Area

910.9km²

1.2 times of Busan
1.5 times of Seoul

Premier Suncheon,
the ecological capital
of South Korea

Budget

1 trillion 393 billion Won
(USD 1,054,105,180)

Tourist

10.16 million
(Based on pre COVID-19)
Suncheonman International Garden, Suncheonman Wetland, Naganeupseong walled town

[The present Suncheon Bay]

Eco-tourism attractions in South Korea

- ▶ Haven for migratory birds
- ▶ UNESCO World Natural Heritage sites

01 The path that Suncheon, the Wetland City has walked

[Ecological wetland restoration project]

- ▶ Sustainable development of eco-tourism resources that can be passed on to future generations
- ▶ Restoration of wetlands for ecosystems and migratory birds, including eight locations such as Dongcheon waterfront, totaling 380,000m²

Transforming Suncheon Bay into a paradise for migratory birds

Removal of 282 utility poles and power lines for the benefit of migratory birds

Underground cabling project

Designation of conservation zones for the ecosystems near Suncheon Bay(7.38km²)

Creation of a safe habitat for migratory birds through organic farming methods

Designation of the first scenic agricultural zone in the country

Operation of winter bird watchers (6 people per day) to protect migratory birds

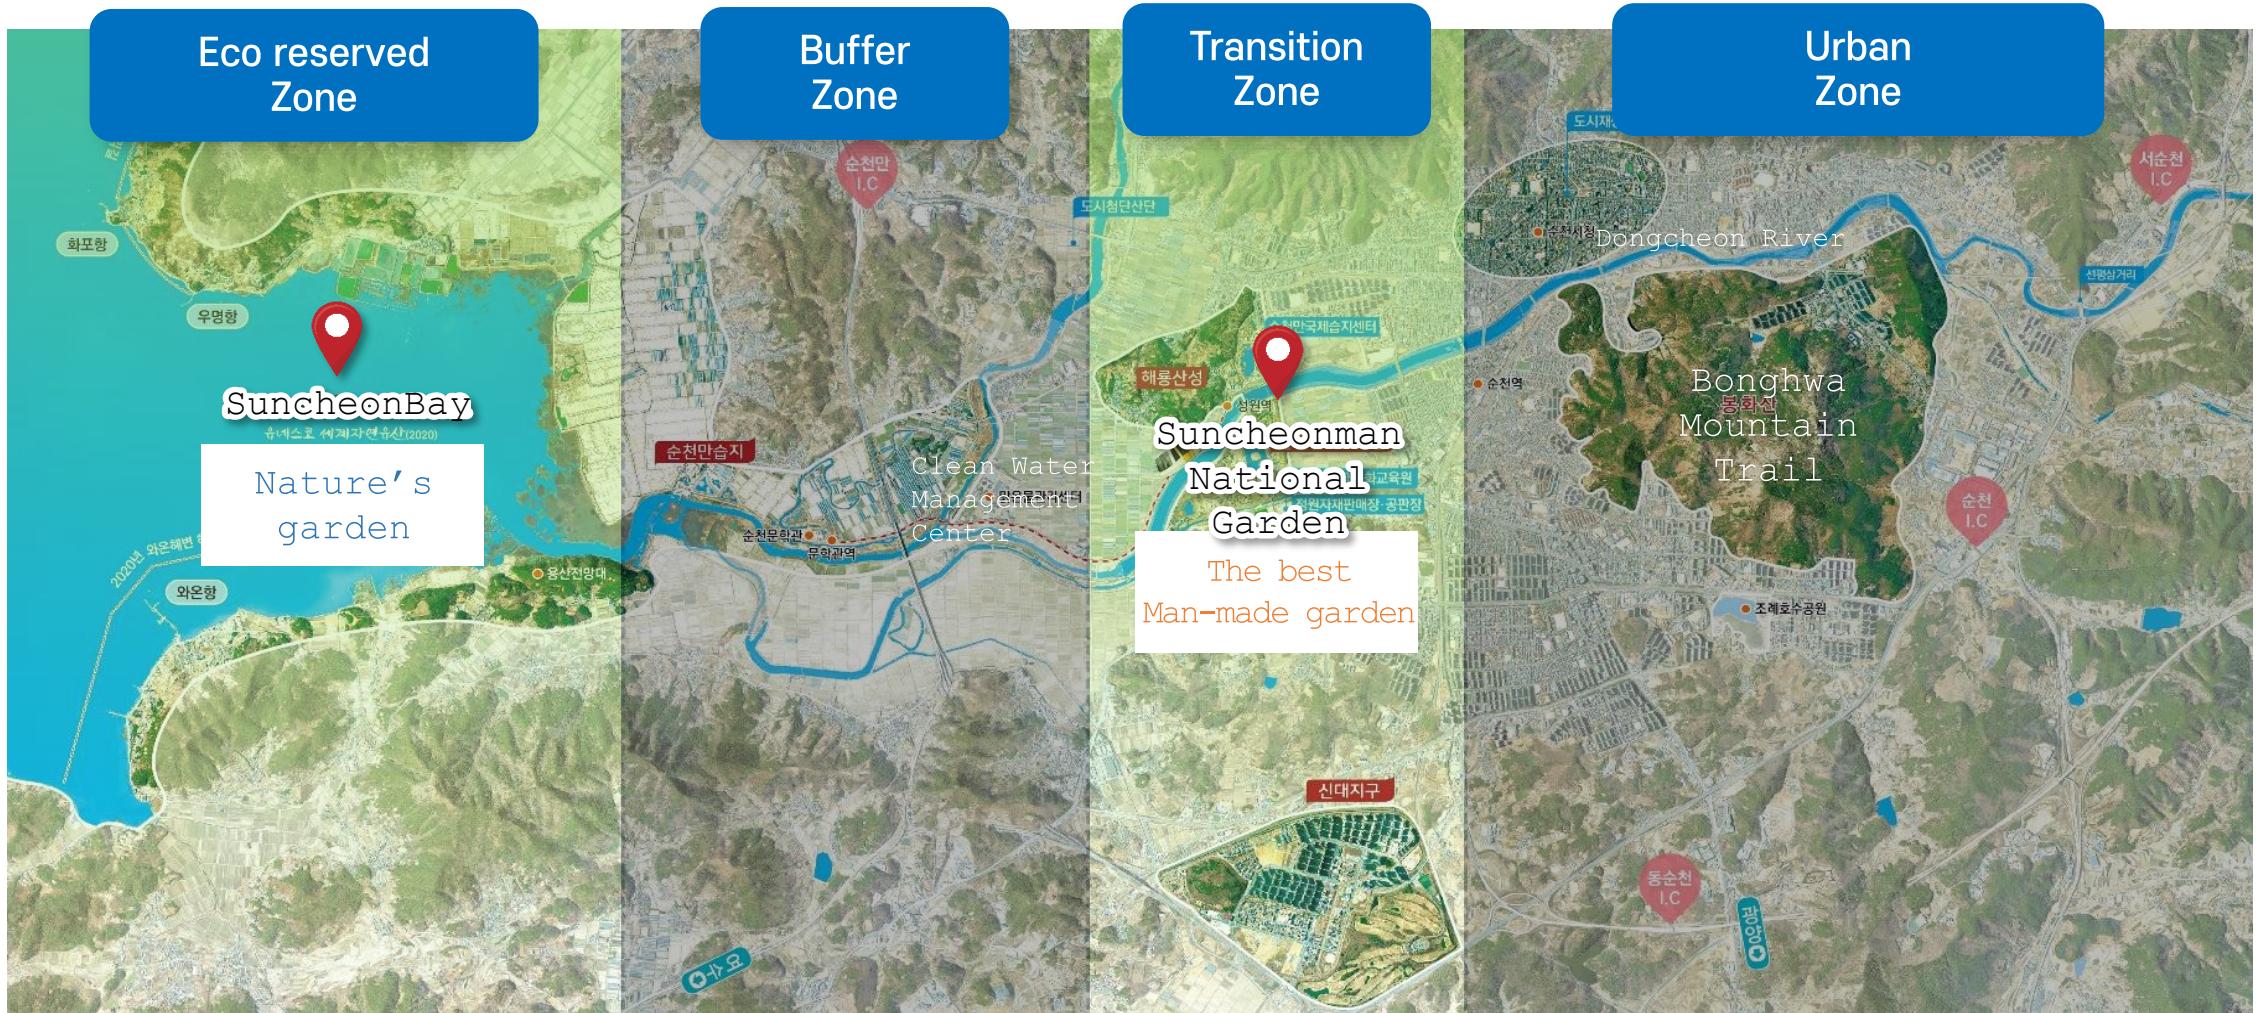

Restriction of access for tourists, vehicles, bicycles, and other modes of transportation

01 The path that Suncheon, the Wetland City has walked

As the population of hooded cranes increases,
The number of tourists also increases

[Master plan for conserving Suncheon Bay]
